

Verizon Surplus Update

Tuesday March 9, 2010,

The Union and the Company met today to discuss issues related to an added incentive on top of the negotiated EISP offer to help relieve surplus conditions. The company presented a detailed proposal and the Union is in the process of reviewing and discussing this proposal with all of the Local's involved. As is the case with all bargaining, the union will review and prepare questions and/or a counter proposal to the company in response to this latest offer. If there is a tentative agreement involving this latest offer, then at that point more detailed information can be provided. A meeting is scheduled with all the Locals in District 13 involved to discuss all of the specifics on 3-10-10. Again once there is more specific and factual information to provide it will be distributed throughout the local and updated on the website. Keep in contact with your Representatives with any questions you may have as they will be receiving all the information as it is distributed
