

Verizon Update

4/9/10

The Company has advised the Union of its intent to proceed forward regarding what it calls “The Force Adjustment Process”. The Company has provided the Union with an advance copy of the corporate wide email that it will be sending to all employees in affected areas. This email gives notice that on or about April 16th the Company will be mailing out EISP packages to employees in surplus titles and locations. These EISP packages are not a notification of layoffs. They are the contractual EISP packages we have seen in the past. As in the past, the Local will now be entering into talks with the Company regarding these Surplus numbers and ways to alleviate them without adverse effects on our membership. Your Union Representatives will be advising you on updates concerning these upcoming talks. Updates will continue to be posted on this website as well. Questions should continue to be addressed through your Representatives and your respective Regional Offices.
